## Controls

- F1) Enable/Disable **Front Right Wheel Motor**
- F2) Enable/Disable **Front Left Wheel Motor**
- F3) Enable/Disable **Rear Right Wheel Motor**
- F4) Enable/Disable **Rear Left Wheel Motor**
- F5) Return to the **Home Screen**
- H) Return to the **Home Screen** (Same as F1)
- S) Go to the **Settings Screen**

- A) Enable/Disable **Pad Cooling Power**  
**(Red when power is applied to the pump)**
- B) Enable/Disable **Pad Cooling Valve Override**  
**(Red when the valve is open)**
- C) **Bin Track Up**
- D) **Bin Track Down**
- Dial) **Push, Turn Right, or Left** – Allows you to adjust **Conveyor Speed**. **Push Again** to accept the new setting.

## Status

### 1) Wheel Status & Automation Indicators

- Displays the orientation of front and rear wheels to visually assist with steering
- Wheels that are disabled will show in **red**
- **Auto Rear Steer** is displayed when rear wheels are in auto centering mode

### 2) Pad Cooling Pressure –

When text reads **“Pump Running”** in **green**, indicates that the pump is running. When text reads **“Pump Not Running”** in **red**, indicates that the pump is not running. The pump should always run momentarily when wrapping. The pressure should return to 40 to 60 psi, after wrap is complete, within a few seconds. (Safe range is 30 to 60)

### 3) Coolant Tank –

Will read **“Empty”** when tank is empty. **You must refill the pad cooling tank within 20 trees of indication**; there will be very little coolant left in the system.

### 4) Conveyor Speed

## Functions

### C) Bin Track Up

When pressed, a warning that the **Sidetrack** is about to be folded up will prompt the driver. There is an option to **Reset** the **Flap** from this screen, back to the reload position. **You must** return the **Flap** all the way to the front of the **Sidetrack**. Make sure the track is **clear** and that the **Flap** is **all the way underneath** the **Sidetrack** **before** folding the track up.
